AMENDMENTS TO THE CLAIMS

This listing of claims will replace all prior versions, and listings, of claims in the application.

Claims 1-22 (Cancelled)

23. (Currently Amended) A device comprising:

a processor;

at least one memory coupled to the processor, the at least one memory including instructions to cause the processor to implement a wireless protocol;

a RF transceiver coupled to the processor; and

an interface coupled to the processor, the interface to receive signals from an equipment;

wherein the processor is to process the signals received from the equipment over the interface; and

wherein the processor is further to process one or more short message service messages received through the RF transceiver from a wireless network, the short message service messages including modem management information; and

wherein the modem management information is to allow at least one of remote initialization and remote control of the equipment, wherein the modem management information includes program code to execute on the wireless modem, wherein the processor is to process the short message service messages at the wireless modem including handling a request for a call log history, and wherein the equipment is selected from a utility meter, a meter
